

Graphisme : représenter graphiquement une situation motrice
- Le relais en boucles alternées.

Three identical sets of a motor situation diagram are arranged vertically. Each set consists of a horizontal line with an oval at each end. Above the line, there are six small squares. Below the line, there are six small squares. The squares are positioned such that they appear to be connected to the line, forming a series of loops or segments. The top set has squares at approximately 1/4, 1/3, 1/2, 2/3, 3/4, and 7/8 of the line's length. The middle and bottom sets have squares at approximately 1/4, 1/3, 1/2, 2/3, 3/4, and 7/8 of the line's length.
